Full Stack Software Engineer
Problem solver and strong communicator eager to prove my talent and value.
Motivated to advance and expand my skill set through targeted mentorship
and challenging projects.

PROJECTS - MORE ON **GitHub**

And Chill — *Invite Your Friends And Match Shows To Watch!*

Using Node.JS, And Chill is an interactive app that allows a user to sign up
for an account and swipe on movies and shows from their favorite
streaming providers. Share the link provided at the top in order to
"match" with friends or families preferred movies and shows.

Pokedex — *View Your Favorite Pokemon!*

Created a fully responsive React application using the public PokeAPI. The
application lists the Pokemon in numbered order and displays some basic
information about the Pokemon when selected.

EXPERIENCE

Cafe Vino Tinto, Safety Harbor, Fl — *Barista*

January 2021 - PRESENT

- Delivering outstanding customer service to all customers by
  connecting and establishing friendly rapport.
- Assisting with new barista training by positively reinforcing
  successful performance and encouraging coaching as needed.
- Assisting in drink and menu development based on the
  community and customer preference.

Kahwa Coffee, St. Petersburg, FL — *Store Manager*

September 2019 - March 2020

- Managed day-to-day operations of the cafe.
- Processed weekly payroll for 10 - 15 staff members using ADP
  Workforce
- Created bi-weekly scheduling for staff based upon sales and event
  projections while maintaining labor costs for each day-part.
- Hired, onboarded and trained new staff on drink preparation and
  proper use of all equipment.
